COURSE SYLLABUS

I. Course Catalog Description

Learners study the relationship between psychological development and doctrines of the Christian life as they apply to youth and developing young adults. The course will cover topics such as entry into the Christian faith, the role of the church in spiritual formation, the role of theology in shaping discipleship and the importance of mentoring in faith formation in the years ranging from teen to young adult.

III. Course Delivery

There are two forms of course delivery Ground and Online:

Ground courses, or those that meet face-to-face on a weekly basis, also have an online component, which means some of the course content is delivered online. Southwestern College utilizes the Blackboard (Bb) learning management system.

Online courses typically contain a blend of synchronous (real-time) and asynchronous (not real-time) material. Depending on the course, you may be required at times to interact "live," which might mean attending a scheduled Collaborate session. You may also be required to view or listen to a lecture or other video on a specific date and time. Of course, if there are circumstances that prohibit you from logging in to a scheduled synchronous activity, an alternate assignment will be provided. Please refer to the Course at a Glance section which will note any synchronous activities.

IV. Learning Outcomes

Learning outcomes describe the knowledge, skills, values, and attitudes that learners gain as the result of a particular learning experience. Southwestern College Professional Studies has learning outcomes specific to each course and each <u>undergraduate</u> and <u>graduate</u> program of study, as well as <u>institution-wide outcomes</u> related to the mission and vision of the college. Outcomes can help learners and instructors focus on the big picture of the learning experience and can help inform potential employers about a graduate's knowledge and skills.

Upon successfully completing this course, the learner will be able to:

- 1. Analyze the various theories of adolescent development in regard to spiritual formation, psychosocial development, and moral development and will arrive at reasoned, holistic conclusions concerning how adolescents develop in each area.
- 2. Evaluate how adolescents mature through faith development and create practices that encourage this development.

- 3. Synthesize adolescent spiritual developmental theories and communicate and create practices that encourage this development.
- 4. Develop confidence in understanding adolescent spiritual formation that may lead to career paths
- 5. Articulate theological positions pertaining to youth ministry and be able to integrate these areas into a final ministry philosophy for young adult spiritual formation.

At the end of the course, learners may vary in their ability to achieve these outcomes. You are more likely to achieve these outcomes only if you attend class and/or online activities as required by the syllabus, complete the requirements for all assignments to the best of your ability, participate actively in class activities and group work as directed, and study diligently for exams.
