COURSE SYLLABUS

I. Course Catalog Description

Learners explore and reflect upon the application of the program outcomes and the knowledge and skills gained from their coursework as they explore, observe, and further experience nursing leadership and mentorship through practice hours (72 hours total to complete the program). While working with nurses in a leadership role, the nursing learner identifies, assists in providing leadership to, and participates in a clinically focused project that will refine clinical, leadership, analytical, decision making, project and task management, interpersonal, communication, and presentation skills. A project plan with expected outcomes is developed by the learner with possible guidance from the Program Director, faculty, Field Supervisor (Preceptor), or an authorized representative from the healthcare setting, if different from the Field Supervisor. The plan is developed and is approved by the Program Director or an authorized representative before the project begins. The Program Director or designee serves as an advisor throughout the project. The course will culminate in the preparation of two comprehensive projects: A scholarly, research-based, and comprehensive report on the outcome of the clinically focused project; and a detailed and substantiated presentation on how the learner has achieved the nursing program outcomes through his or her coursework, practicum, and professional nursing project.

Prerequisite: completion of all NURS courses (concurrent enrollment permitted with prior approval from the Nursing Director.) Credit 3 hours.

III. Learning Outcomes

Learning outcomes describe the knowledge, skills, values, and attitudes that learners gain as the result of a particular learning experience. Southwestern College Professional Studies has [learning outcomes specific to the Nursing Program](#), as well as [institution-wide outcomes](#) related to the mission and vision of the college. Outcomes can help learners and instructors focus on the big picture of the learning experience and can help inform potential employers about a graduate's knowledge and skills.

Upon successfully completing this course, the learner will be able to:

Learning Outcome	Related Program Outcome(s)
1. Present evidence and artifacts from nursing courses to document achievement of the BSN program outcomes.	1, 2, 6, 7, 8, 9, 10
2. Identify a healthcare issue and describe an evidence-based process for changing current practice.	3, 4, 5, 6, 7, 8, 9
3. Conduct a literature review to identify practice issues which help to guide the selection of a professional project.	3, 6
4. Identify effective time-management and budgeting skills related to the professional nurse leader role.	5, 6, 7, 8, 10

Learning Outcome	Related Program Outcome(s)
5. Use interpersonal communication and presentation skills to articulate the results of a clinically focused project.	1, 3, 4, 5, 8, 10
6. Explain how the BSN program outcomes can be applied to nursing leadership roles.	4, 6, 8, 10

At the end of the course, learners may vary in their ability to achieve these outcomes. You are more likely to achieve these outcomes only if you attend class and/or online activities as required by the syllabus, complete the requirements for all assignments to the best of your ability, participate actively in class activities and group work as directed, and study diligently for exams.
