Program Description
The Information Systems Management (I.S.M) Program prepares learners to successfully manage information systems innovation, design, development and operations. The program emphasizes broad knowledge and skills in information systems management and administration and applied knowledge in project, information security, design and development and innovation management. In addition, the I.S.M. Program offers areas of specialization in security, enterprise, and data management and decision support.

Learners demonstrate their knowledge and skills throughout the program though their application to realistic scenario and simulation-based activities and applied projects. The core program is 30 hours with 10 core courses and, if a specialty is chosen, nine additional hours in three specialization courses.

Admission Requirements
1. Have completed a minimum of 6 post-high school college credits
2. Minimum GPA of 2.0
3. Minimum of 3 years of post-high school work experience
