

Principles of Microeconomics
SSC 110 [all sections]
Southwestern College Professional Studies

COURSE SYLLABUS

I. Course Description

Principles of Microeconomics provides students with an introduction to fundamental economic concepts and to how these concepts play out in the real world. Students will apply essential models of economics to concepts such as economic interdependence and market equilibrium and think about how these models contribute to optimal resource allocation. Students will address classic microeconomic issues such as profit maximization and determining the optimal output. Students will also discover how decisions are made within companies in different market structures and how the industry within which a company operates affects its competitive efficiency.

Course Delivery

There are two forms of course delivery, Ground and Online:

Ground courses, or those that meet face-to-face on a weekly basis, also have an online component, which means some of the course content is delivered online. Southwestern College utilizes the Blackboard (Bb) learning management system.

Online courses typically contain a blend of synchronous (real-time) and asynchronous (not real-time) material. Depending on the course, you may be required at times to interact “live,” which might mean attending a scheduled Collaborate session. You may also be required to view or listen to a lecture or other video on a specific date and time. Of course, if there are circumstances that prohibit you from logging in to a scheduled synchronous activity, an alternate assignment will be provided. Please refer to the [Course at a Glance](#) section which will note any synchronous activities.

III. Learning Outcomes

Learning outcomes describe the knowledge, skills, values, and attitudes that learners gain as the result of a particular learning experience. Southwestern College Professional Studies has learning outcomes specific to each course and each [undergraduate](#) and [graduate](#) program of study, as well as [institution-wide outcomes](#) related to the mission and vision of the college. Outcomes can help learners and instructors focus on the big picture of the learning experience and can help inform potential employers about a graduate’s knowledge and skills.

Upon successfully completing this course, the learner will be able to:

1. Explain the concepts that make up the foundation of the study of economics.
2. Illustrate market equilibrium using the tools of supply and demand.
3. Analyze the benefits of economic interdependence using the economic model of comparative advantage.
4. Explain the circumstances in which markets may fail.
5. Differentiate between economic profit and accounting profit.
6. Calculate profit-maximizing functions using marginal analysis.

7. Explain the issues that influence competitive decisions for companies in different market structures.

At the end of the course, learners may vary in their ability to achieve these outcomes. You are more likely to achieve these outcomes only if you attend class and/or online activities as required by the syllabus, complete the requirements for all assignments to the best of your ability, participate actively in class activities and group work as directed, and study diligently for exams.

IV. Expectations

XV. Senior Capstone and Graduate Projects:

The majority of the programs offered by Southwestern College Professional Studies conclude with a Senior Capstone or Graduate Project. During the Capstone or Project course students will be required to retrieve papers, assignments and projects that they created during their entire program of study. For this reason it is imperative that students design a method of storing program course work for use during their final class at Southwestern College Professional Studies.
