

**Principles of Macroeconomics**  
SSC 111 [all sections]  
Southwestern College Professional Studies

**COURSE SYLLABUS**

---

**I. Course Description**

Principles of Macroeconomics introduces students to fundamental economic concepts and encourages them to consider how those concepts apply to the real world and to their own lives. Students will explore the models of economics, how they portray economic interdependence and market equilibrium, and how they contribute to optimal resource allocation. Students will examine classic macroeconomic issues, such as the effects of government intervention on businesses and individuals. They will evaluate macroeconomic conditions and think about how monetary and fiscal policies affect the corporate world and the overall economy. Students will distinguish between short- and long-run macroeconomic forces and learn how monetary systems influence economic variables.

Print ISBN: 9781285165950

**Course Delivery**

There are two forms of course delivery, Ground and Online:

Ground courses, or those that meet face-to-face on a weekly basis, also have an online component, which means some of the course content is delivered online. Southwestern College utilizes the Blackboard (Bb) learning management system.

Online courses typically contain a blend of synchronous (real-time) and asynchronous (not real-time) material. Depending on the course, you may be required at times to interact “live,” which might mean attending a scheduled Collaborate session. You may also be required to view or listen to a lecture or other video on a specific date and time. Of course, if there are circumstances that prohibit you from logging in to a scheduled synchronous activity, an alternate assignment will be provided. Please refer to the [Course at a Glance](#) section which will note any synchronous activities.

**III. Learning Outcomes**

Learning outcomes describe the knowledge, skills, values, and attitudes that learners gain as the result of a particular learning experience. Southwestern College Professional Studies has learning outcomes specific to each course and each [undergraduate](#) and [graduate](#) program of study, as well as [institution-wide outcomes](#) related to the mission and vision of the college. Outcomes can help learners and instructors focus on the big picture of the learning experience and can help inform potential employers about a graduate’s knowledge and skills.

Upon successfully completing this course, the learner will be able to:

1. Explain the concepts that make up the foundation of the study of economics.
2. Determine the benefits of economic interdependence using the economic model of comparative advantage.
3. Illustrate market equilibrium using the tools of supply and demand.
4. Explain short- and long-run economic fluctuations using economic variables.
5. Explain the monetary system and how it affects the long-run behavior of the economy.

6. Explain how monetary and fiscal policies impact the corporate world and the overall economy.

At the end of the course, learners may vary in their ability to achieve these outcomes. You are more likely to achieve these outcomes only if you attend class and/or online activities as required by the syllabus, complete the requirements for all assignments to the best of your ability, participate actively in class activities and group work as directed, and study diligently for exams.

**XV. Senior Capstone and Graduate Projects:**

The majority of the programs offered by Southwestern College Professional Studies conclude with a Senior Capstone or Graduate Project. During the Capstone or Project course students will be required to retrieve papers, assignments and projects that they created during their entire program of study. For this reason it is imperative that students design a method of storing program course work for use during their final class at Southwestern College Professional Studies.
